Dear Amy,

I am writing to say "thank you" to you and the entire team at Sundog Solar. Every step of the way you, Brian Bean and the entire crew were most thoughtful, friendly, professional and responsive to my many questions. The meticulous care everyone gave to the installation and the grounds surrounding the pole mounted panels was terrific.

The commitment everyone displayed to both the quality of their work and the alternative energy movement is outstanding.

I am new to the alternative energy movement and plan to encourage my friends, family, and neighbors to get on board. Yvette and I derive much pleasure as we read our meter's output of kilowatts generated and the number of pounds of carbon emissions saved by this environmentally friendly way to generate energy.

Please feel free to use me as a reference for future customers.

Sincerely,

Howard Gollub
